## A Nomenclatural Note on *Erebia magdalena* Strecker in U.S.A. (*Lepidoptera*, *Satyridae*)

Muhabbet Kemal Ahmet Ö. Koçak

**Abstract:** A Nomenclatural Note on *Erebia magdalena* Strecker in U.S.A. (*Lepidoptera*, *Satyridae*). *Cent. ent. Stud.*, Misc. Pap. 137: 1.

A replacement name, *Erebia magdalena* ssp. *hilchie* (nomen novum) is proposed for *Erebia magdalena* ssp. *saxicola* Hilchie, 1990 nec Oberthür, 1876 in the family *Satyridae* in U.S.A.

**Keywords:** *Erebia magdalena hilchie saxicola Satyridae Lepidoptera* U.S.A. nomenclature

### *Satyridae*

#### *Erebia magdalena* ssp. *hilchie* (nomen novum)

Hilchie (1990)<sup>1</sup> proposed a new subspecific name, ssp. *saxicola* within the genus *Erebia magdalena* Strecker in the U.S.A. During our researches concerning the Project of the Cesa<sup>2</sup>, we noticed that this name cannot be used as valid name in the genus *Erebia* Dalman, as it is junior primary homonym of *Erebia saxicola* Oberthür, 1876 (*Etüd. Ent.* 2: 32, pl.4 fig.1). Oberthür's name is currently represented as valid of a species in the genus *Loxerebia*, inhabiting in Tibet, Szechuan, Cashmir, and Mongolia (Central Asia). Due to the homonymy, and the lacking of a senior synonym, we propose here a replacement name, ssp. *hilchie* for the taxon, ssp. *saxicola* Hilchie, 1990 nec Oberthür, 1876, by dedicating to the original autor of the subspecific name.

## Revised and Expanded List of the Vernacular Names of the Lepidoptera in Uighur Language

Muhabbet Kemal Ahmet Ömer Koçak

**Abstract:** Revised and Expanded List of the Vernacular Names of the Lepidoptera in Uighur Language. *Cent. ent. Stud.*, Misc. Pap. 137: 1-12.

This paper deals with the vernacular names in Uighur language of the Lepidoptera species and subspecies in Asia. Totally 766 species group names of various butterfly and moth families, are listed together with the revised vernacular names in Uighur language.

**Key Words:** *Lepidoptera*, list, species, subspecies, vernacular names, Uighur language.

<sup>1</sup> Classification, relationship, life history, and evolution of *Erebia magdalena* Strecker (Lep., Satyridae). *Quaestiones Entomologicae* 26 (4): 665-693.

<sup>2</sup> Diversity of the Lepidoptera in the World (DLW)

In the first attempt on the vernacular names of the Lepidoptera of Turkey, nearly 300 species were listed by the authors (Koçak & Kemal, 2001)<sup>3</sup>. Authors used Uighur vernacular names in the subsequent publication<sup>4</sup> and added new proposals. In the present list, all the previously submitted vernacular names in Uighur language are revised from the linguistic standpoint and expanded to the other Asiatic groups of the butterflies.

Totally 766 vernacular names, belonging to various species and subspecies, are proposed below. In the list, scientific names (bold) are arranged alphabetically within their families (in paranthesis). Vernaculars are given in italics.

#### MISCELLANEOUS PAPERS

ISSN 1015-8235

**Miscellaneous Papers** is a scientific serial published by the Centre for Entomological Studies Ankara at irregular interval in a year. The serial serves as a refereed publication outlet and accepts original manuscripts on insects, especially **short** (2-16 pages) articles dealing with their taxonomy, nomenclature, checklist, fauna, biodiversity, distribution, biogeography, ecology, insect-plant interactions, bionomy, and behaviour. The CESA is a non-profit organization, no royalties will be paid to authors of contributions. Papers accepted become the copyright of the journal.

Pdf files are freely available for the contributors and conditionally available for the subscribers via Prof. Dr. Ahmet O.Kocak [cesa\_tr@yahoo.com.tr], for only their personal usages.
